DETAILED ACTION

The following is an examiner's statement of reasons for allowance: The prior art made of record did not disclose or render obvious a liquid injector for causing a syringe to suck a liquid from a liquid tank and inject the liquid into a patient comprising an attachment tube having a trailing end connected to a solution injector for injecting a solution into the patient, tube attaching means for attaching a leading end of the attachment tube to the patient tube, and an attachment block mechanism for pressing and blocking the attachment tube to freely open or close the attachment tube, wherein the interlock control means causes the attachment block mechanism to release the blocking only when the connection switch mechanism blocks the patient tube in combination with the other limitations recited in claim 1. The Yamamoto reference does not qualify as prior art under any statute and therefore cannot be applied to the claims presented by the Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
